

Ryan Tomlinson - Web Developer

(573) 872-7613

176 CR 4415, Poplar Bluff, MO 63901

Education:

B.A. Bible, Minor: English, Pensacola Christian College, 2008-2012

CERT: Web Development, Liberty University, 2017-2018
4.0 GPA

In my undergraduate work and certificate program, I have taken classes in Graphic Design, Digital Typography, Application Programming, Website Construction and Design, and object-oriented programming. I have designed websites and created functional programs to solve problems.

Relevant Experience:

2013-2015, S.J. Rollins Technologies

At S.J. Rollins, I went from a building computers to solving problems with applications and installing, migrating and managing servers for small and mid-sized businesses. My primary responsibility was network installation, setup, and troubleshooting. I learned the practical and theoretical use of the OSI model and how to secure networks using Cisco adaptive security appliances.

I have always been fascinated with technology and how it works. What started as a boy taking apart computers and putting them back together, has grown in me as a desire to solve problems with technology, so programming and web development was the next logical step. I am an intelligent individual who is not afraid to ask questions about how and why things are the way they are. I plan to spend the rest of my life in this field as it is always new, exciting, and fulfilling to me.
